

Innovative cost effective synthetic grass solutions

TigerTurf Schools

TigerTurf. Turning tired schoolgrounds into brilliant multisport playgrounds. . . and more.

A common problem for many primary and secondary schools is having bare, bumpy ovals that are rock-hard in summer and virtually unusable 'mudbaths' in winter; asphalt surfaces that take skin off knees and the fun out of play; and space constraints that simply limit the scope of activities they're able to offer.

This is where TigerTurf's market-leading synthetic grass surfaces (and expert design team) can assist greatly in delivering high quality tailored solutions that transform school grounds into aesthetic, safe and practical play areas which are usable 'day in, day out' regardless of weather ~ and turn existing plain sport spaces into brilliantly versatile multisport facilities.

The creative possibilities are endless. Using all kinds of bright, fade-resistant colours, you can incorporate everything from running tracks to rounders, 4square and hopscotch activities in the same area ~ or simply add extra line markings for mini-football, cricket, netball or tennis.

Long-life, low maintenance and 'drought proof', the installation of TigerTurf's specially cushioned surfaces in schools is also having the important effect of decreasing playground injuries.

TigerTurf's unique 'one stop shop' package, from design and construction to installation and maintenance provides customers with one efficient point of contact.

- TigerTurf can fully convert natural grass ovals to synthetic which provides an all weather reliable surface all year round.
- Standard sports fields for all codes including basketball, hockey and netball are available.
- TigerTurf is an increasingly popular option for general landscaping in schools. Lush, green and no water needed!

Versatile.

Broaden your students playing options with a multisport area that incorporates several activities in the one space. Usable all year round regardless of weather.

Cost Efficient.

TigerTurf surfaces can be applied cost effectively over existing asphalt or constructed on natural turf areas. Quality design, construction and installation techniques ensure your **TigerTurf** surface will remain in good structural condition throughout its life.

Safe.

Reduce the number of playground injuries caused by concrete or asphalt - schools have recorded as much as a 60% reduction in injuries as a result of installing a **TigerTurf** surface.

Incorporate a running track as a bright, practical and distinctive feature on your school playing fields and make sports days a pleasure for all.

TigerTurf can convert natural grass ovals or fields to synthetic sports fields for athletics, football, cricket . . . in fact **TigerTurf** has surfaces for all sports and recreation played independently or combined in the same area. **TigerTurf's** long blade grass and performance infills replicate the playing performance and feel of natural turf fields.

TigerTurf landscape grass is always green and perfect for passive and recreational landscape areas.

TigerTurf grass replaces dusty, dry ground with a lush, low maintenance surface that looks and feels just like the real thing.

TigerTurf. FAQs.

Q. Does the grass cause abrasive burns?

A. The friction burns associated with old style synthetic surfaces are a thing of the past. The latest technology in fibres and infill, significantly reduces the incidence and severity of friction burns when compared to concrete, asphalt, hardened clay pans, polished wood and of course old style synthetic grass surfaces.

Q. Is there a difference between grasses?

A. Yes, the yarn type, stitch rate and quality can vary and it is important to ensure you are comparing like with like. TigerTurf manufacture using premium yarns with a durable backing material. Feel free to ask TigerTurf for a specification sheet.

Q. Is synthetic grass maintenance free?

A. All synthetic surfaces require some maintenance depending on the level of usage. On completion of your installation TigerTurf will provide full details and the offer of a maintenance service contract.

Q. How important is drainage on the field?

A. It is critical that all water is drained off the field effectively and responsibly, relative to the site situation.

Q. How long will it last?

A. Depending on the level of usage you should budget for a replacement surface after 10-12 years. We offer a 7 year manufacturers warranty.

Q. Where can I see TigerTurf installed?

A. Contact us on 1800 802 570 for a list of projects nearest to you.

TigerTurf. Testimonials.

"Your efforts have transformed an area that was bare, unuseable and unsightly to an area that is 'full of life', constantly usable regardless of weather conditions and very attractive to the eye. You were always at hand both by phone and in attendance at our meetings."

Tony Cerra (Assistant Principal)
Balwyn North Primary School, VIC

"TigerTurf has transformed an ordinary playing area of the College into an attractive, safer and practical surface which has encouraged students and staff to better utilize this area whether participating in general recreation or more serious training. It has certainly been a welcome addition to the College's already extensive playing fields and has added flexibility for our Physical Education program."

Phil Hollingsworth (Business Manager)
St Patrick's College, Launceston

"So now we have lots of children playing their normal sports of hockey, tennis, netball and other games daily, using the surface as though it was bitumen.

The school has been very impressed with your high degree of efficiency, from the beginning to the completion of the project"

Pauline Grewar (Principal)
Castletown Primary School, WA

"...our school had an all bitumen playground and we were constantly concerned about accidents. The TigerTurf play areas has given the school a visual lift and a much safer play area. We haven't seen as many children playing happily in this area for years."

Ross Newman (Deputy Principal)
Woollahra Public School, NSW

"Our bitumen tennis court had a TigerTurf facelift and transformed into a multi sport facility for tennis, volleyball and netball games. Our students are delighted with the result and use it every morning and during both lunch breaks. PE lessons are now very popular, and parents are happy that students are active during recess times."

Arthur Begega (Principal)
Avondale State School, QLD

Why TigerTurf?

- TigerTurf is manufactured in our New Zealand facility which has been producing synthetic grass since 1981.

We are a leader in global synthetic turf with manufacturing facilities in New Zealand, USA and the United Kingdom. We have total control over our production and quality and have ISO 9001 certification, the highest level of quality a manufacturing plant can achieve.

- We invest heavily in research & development and have our own laboratory. We are not just a "me to" manufacturer. We are an innovative company and are continually developing new products for all applications. TigerTurf invest heavily to provide surfaces accredited to international sports bodies such as FIFA (football), FIH (hockey) and ITF (tennis).

TigerTurf.

Performing in other areas.

Since 1981 **TigerTurf** has offered the complete range of premium synthetic grass and acrylic coatings for all sporting and landscape applications complemented by our complete one stop shop service. From on site visits, design, construction, installation and maintenance, **TigerTurf** directly constructs and manages the project to your guaranteed satisfaction. **TigerTurf** sports and landscape surfacing systems are used in school, community and elite sport environments and include a wide range of systems accredited by national and international sporting associations including Federation International Football Association (FIFA), Federation of International Hockey (FIH), International Rugby Board (IRB), International Tennis Federation (ITF), Australian Football League (AFL) and Cricket Australia (CA).

Landscape. **TigerTurf** grass is always green, always lush. It requires no watering or mowing, so relax and enjoy. Our latest landscaping products have been developed specifically to harmonise with the natural environment, improving safety for children, increasing usage for the community and bringing green and durable grass surfaces to outdoor areas without the need for water.

TigerTurf manufacture synthetic lawn products that give the look and feel of natural grass but offer the family, pets included, all the added benefits of the latest synthetic solutions. First class presentation, low maintenance and durability in high usage areas are the hallmarks of **TigerTurf** synthetic grass. It looks and feels just like the real thing.

Hockey. Stringently tested and fully endorsed by the FIH, **TigerTurf** is not only made from the finest quality synthetic yarns, its fibres are specially designed to be non-directional ~ ensuring exact across-the-ground passing accuracy and optimum control over ball speed and bounce.

Play. **TigerTurf** shock absorbing synthetic grass surfaces can assist greatly in delivering tailored solutions that transform playgrounds into high quality, all-weather playscapes that maximise delight and minimise injury ~ day in, day out.

Tennis. **TigerTurf** supplies a range of synthetic tennis surfaces to International Tennis Federation standards, designed for differing performance requirements; players benefit from a sure-footed surface that not only delivers excellent traction, but the shock-absorbency and 'give' needed to be gentle on their joints and prevent injury.

TigerTurf also supply and install the full range of acrylic surfacing options. From economical acrylic hard court coatings to high performance cushioned acrylic surfaces, **TigerTurf** can meet your needs.

Football/AFL/Rugby. **TigerTurf** is an accredited licensee of the FIFA Quality Concept and AFL/Cricket Australia (CA). Using exclusive new yarns with innovative manufacturing methods, the most realistic and natural looking artificial grass surfaces ever produced for football and AFL are now available.

In terms of toughness, they are also able to take all the stomping (and skids from studded boots) that teams can throw at them ~ season after season. This has been proven time and time again in the many **TigerTurf** installations already completed throughout Australia and worldwide.

Bowls. Endorsed for tournament level use by World Bowls, Bowls Australia and Bowls New Zealand, **TigerTurf** synthetic greens not only provide clubs with superb surface options available 365 days of the year, but also greatly reduced maintenance costs.

Transform your school and provide a **TigerTurf** solution to tired asphalt or patchy grass surfaces.
