

Facility Profile: Hawker Football Centre, Canberra, ACT

TigerTurf: Soccer Real

ACT Minister of Sport, Mr Andrew Barr, officially opened the redeveloped Hawker Football Centre on Friday, 31st July 2009.

The natural playing field has been replaced with TigerTurf Soccer Real, an international standard synthetic surface.

Andrew said it was exciting to start the process of drought proofing Canberra.

'We recognise we do have challenges that we face in the longer term to drought proof our facilities and this is a very practical example of how we can achieve a positive outcome, a fantastic world class facility that isn't drawing on our water supply' he said.

The surface has been tested to FIFA 2 Star which means it is designed to basically mirror the playing characteristics of professional football and FIFA final found competitions and top UEFA competitions can be played at the venue.

TigerTurf Soccer Real produces a pitch that performs like a freshly watered, high quality natural turf, without the need for water. Players skills and enjoyment are enhanced as the surface is more consistent and safe.

TigerTurf: Soccer Real

A third generation, soft, 4 ended monofilament polyethylene surface. Soccer Real is a premium value and premium performance surfacing system that is manufactured with one of the most advanced synthetic monofilament yarns in the world. This yarn is exclusive to TigerTurf. Part infilled with sand and rubber.

Performance:

FIFA 2 Star Field Test *

Applications:

Soccer

Range:

Football

Guarantee:

8 years

* To achieve a FIFA recommended 1 or 2 Star certificate, the product which has been FIFA laboratory tested and met all the requirements can be installed in a field. After installation a field test should take place. If the field successfully meets all the FIFA requirements a FIFA RECOMMENDED 1 or 2 Star certificate is issued. FIFA only certify the field and not a product laboratory test)
