

Tournament quality surfaces that never need a rest.

Overview

Endorsed for tournament level use by World Bowls, Bowls Australia and Bowls New Zealand, TigerTurf synthetic greens not only provide clubs with superb surface options available 365 days of the year, but also greatly reduce maintenance costs.

Whether you choose to invest in our internationally renowned woven green 'Bowlsweave', the durable medium speed needlepunch 'Bowlsmat' or our own finely tufted grass and sand-filled 'Supergreen II', the bottom line is that they all deliver a true and superbly consistent surface that is playable day in and day out ~ season after season, year after year. Which, in addition to pleasing existing members, will almost certainly help you to attract new ones ~ and keep the 'financial kitty' full. This has proven to be the case with virtually every TigerTurf installation completed to date in over 300 bowls clubs in 8 different countries.

Time and again, impressed bowlers comment in surprise at how closely TigerTurf surfaces emulate the green speed and draw of natural turf, and how comfortable they feel underfoot. These are all qualities that TigerTurf has spent years researching, testing and perfecting. Today, our advanced methods of base construction, grass manufacture and installation deliver synthetic solutions that genuinely reflect what players and bowls administrators both seek ~ excellence in green performance. All backed by ongoing service support and a 5 Year Product Warranty.

Range: Star

TigerTurf's Bowlsweave is a 100% U.V. stabilised polypropylene woven material and regarded as the elite surface of choice by most clubs. Bowlsweave provides a consistent and durable surface requiring minimal maintenance and provides comparable speeds to free running natural greens. Bowlsweave surfacing systems incorporate an underlay system for green speed consistency and accuracy.

Range: Premier

TigerTurf Supergreen II is a sand filled non directional synthetic grass delivering performance, durability and reliability. Yarn quality and infill levels ensure free running and smooth performance through product life, at a very affordable price.

TigerTurf Bowlsmat is a polypropylene needle punch material designed particularly for application in low temperature, cooler climates. Bowlsmat will provide a slower green speed and is backed by a full manufacturer's warranty.

Range: Standard

TigerTurf Ditchbank and Ditchgrass are polypropylene tufted synthetic grasses used to ensure ditches are finished superbly to compliment the new green.

TigerTurf also has a range of landscape long pile grasses for green surrounds and general landscape areas - see TigerTurf for more details.

Product	Description	Green Speed	Performance Level	Pile Height mm	Warranty Period years	Category
