

TigerTurf: Multisport

Synthetic grass surfaces specially designed to turn standard school grounds into brilliant multisport playgrounds.

Overview

All schools recognise the year-round importance of providing sports & recreation areas where students can enjoy developing their physical abilities. However, a common problem many schools face is that they're stuck with bare, bumpy ovals that are rock-hard in summer and virtually unusable 'mudbaths' in winter; asphalt surfaces that take skin off knees and the fun out of play; and space constraints that simply limit the scope of the activities they're able to offer.

This is where TigerTurf synthetic sports ground systems (and our expert design team) can assist greatly in delivering high quality tailored solutions that transform school grounds into stimulating, safe and practical play areas which are usable 'day in, day out' regardless of weather. Customised TigerTurf grass turns existing plain sport spaces into brilliantly versatile multisport facilities.

The creative possibilities are endless. Using all kinds of bright colours, you can incorporate everything from running tracks to rounders, 4 square and hopscotch activities in the same area ~ other options may include extra line markings for mini-football, cricket, netball or tennis.

Consider the alternative to resheeting old asphalt with flexible TigerTurf surfaces delivering school yard solutions' and, as many schools report, up to a 60% decrease in playground injuries.

Long-life, low maintenance and a real answer to water restrictions, TigerTurf offers the complete resurfacing package. TigerTurf can also provide a unique water harvesting option to capture and collect all the precious rain water which falls on the multisports field. Beyond being a pleasure to play on (and surprisingly affordable) its made-to-order construction is backed by professional installation, ongoing service support and a full manufacturers product warranty.

Range: Star

TigerTurf Tournament 1000 is the benchmark surface for school multisport fields. A 19mm medium pile yarn has a higher density stitch rate for a more durable, longer lasting surface. Tournament 1000's dense, fibrillated surface provides brilliance to line markings and colours.

Range: Premier

TigerTurf Tournament is a medium density, 19mm polypropylene surface. Designed to last in all weather conditions and capable of handling intensive use in schools.

Range: Standard

TigerTurf Classic is a 19mm polypropylene designed with a budget in mind. Classic is an entry level option and available in numerous colours to suit your requirements.

Product	Description	Use	Pile Weight g/sqm	Pile Height mm	Warranty Period years	Category
