

Synthetic grass surfaces so well designed, they combine safety and having fun.

Overview

As every parent and child carer knows, playgrounds are places where kids run wild.

So the top priority is always that they're designed in a fashion that finely balances fun with safety; and results in laughter and learning instead of tears (or worse) from hard tumbles.

This is where TigerTurf's shock absorbing synthetic grass surfaces can assist greatly in delivering tailored solutions that transform playgrounds into high quality, all-weather playscapes that maximise delight and minimise injury ~ day in, day out.

The design options open to you are endless. Allowing you to combine all kinds of colours, textures and shape variations to create a wonderfully stimulating and interactive surface; and very importantly, ensuring that you're able to build in the optimum level of rubber pad cushioning for different pieces of play equipment.

Long-life, low maintenance and a real answer to creating uniquely inviting play areas that put childrens' safety first, TigerTurf offers the complete resurfacing package ~ delivering a range of possibilities to suit every budget. Beyond meeting strict manufacturing standards, its made-to-order construction is backed by professional installation, ongoing service support and a full manufacturers product warranty. We offer a free measure, quote and design service on all surfacing options; and can also assist you with including everything from sand pits, forts to shade sails and fencing according to your individual project needs.

Range: Premier

TigerTurf Tournament 1000 is a high density polypropylene grass for maximum durability and long life. Used extensively under rugged school, multisport conditions, Tournament 1000 performs superbly in playscape environments.

Range: Standard

TigerTurf Classic is the surface of choice for play environments for flexibility, durability and affordability. TigerTurf grass is used in conjunction with rubber shockpads, fitted invisibly under the grass, to meet critical fall height requirements under play equipment. Classic is available in a range of attractive colours to provide a clean, safe and bright environment.

Landscape Grass:

TigerTurf Landscape grasses are long pile natural grass alternatives and provide the maintenance free alternative to muddy, sparse grounds. Landscape grasses are sand/rubber filled and available in a range of styles; Tuf Turf, Lush and Meadow.

Please ask TigerTurf for samples and product details.
