

Facility Profile: Riverton Rossmoyne Bowling Club, WA

TigerTurf: Bowsweave

The club, situated in Perth's south, has been enjoying the benefits of their TigerTurf Bowsweave green for nearly 12 months.

The club formed in 1959, with members in excess of 470, made the decision to convert one of its four natural grass greens to TigerTurf Bowsweave so they could benefit from all year round play. *'The natural grass is too heavy in the winter months'* says Grounds Manager, Roger Shackleton.

Men's President, John Roberts commented that it was the best decision the club has made and surrounding clubs appreciate the new surface too. Another added benefit is the surface does not scratch the bowls.

TigerTurf Bowsweave is approved to World Bowls standard.
